APOLLO TRAINING CLINIC

SYNTHETIC TRAINING RECORD · NOT FOR CLINICAL USE

# Medication reconciliation

Recorded medicines and allergy review

Patient: Robert Chen
DOB: 1953-06-08
MRN: RC-DEMO-002
Report Date: 2024-06-12

The entries below reproduce selected medicines from Robert Chen's synthetic admission record. A recorded medication is not a new prescription. The held status of metformin must remain visible when this document is reviewed or imported.

## Current medications

- Ramipril 5mg daily
- Carvedilol 12.5mg twice daily
- Metformin 500mg twice daily (held during admission)

## Allergy record

Allergy: Aspirin — bronchospasm

## Reconciliation note

Other medicines remain listed in the existing patient record. This focused reconciliation sheet does not replace the complete medication list or authorize a dose change.

## Recorded next step

Follow-up: Confirm the held medication status with the prescribing team.
